

Q.Can you paint these murals other than on walls?

A. GulfMurals can supply murals handpainted on to canvas or flex face for transporting later if you prefer. We will need to know the size required so we can order the material. The canvas or flex face murals are painted purely with flexible acrylic paint, not emulsion, so the chances of it cracking are minimal when rolled for transport. The best way to install a canvas mural is to have it stretched over a large frame by a professional framer or a carpenter. Then it is hung on brackets or long screws and fixed to the wall. If you require your mural done this way, we will more than happy to assist you. Please mention this when you send us a Murals Quote Request.
