

Q. How long does it take to get a mural done for my home?

A. This depends on the design. A very detailed mural design that covers all 4 walls will take longer to paint (approximately 5-7 days), than a simple design on a single wall. Simple designs, like a car can take a day and a half to finish. Some of our complex work have even taken upto 10 -12 days to complete. So it all depends on the work, and the complexity of the design.
